

Summary of Changes Report

Ankle Sprain

March 2006

ICSI has developed a new format for all guidelines. Key additions and changes are:

The annotation and discussion section have been combined. Any duplicated statements have been removed. Most of the annotations will have “Key Points” at the beginning. This informs the reader of key recommendations, highlights, or information pertinent to that annotation. References in support of recommendations or conclusions are listed in the body of the annotation. A complete list of references is included in the Supporting Evidence section.

Algorithm, Annotations, and References

Clinical Highlight # 4. Clarifying language was added.

Annotation #6. Out of Guideline: Recurrent Ankle sprains. The definition of ankle sprain was refined.

Aims & Measures, Measurement Specifications

No changes were made to the Aims & Measures or Measurement Specifications.

Support for Implementation

No changes were added to the Support for Implementation section.
