

## **Tips for Viewing ICSI Scientific Documents**

ICSI has made a significant format enhancement in our scientific documents. All scientific documents (excluding Order Sets) now have "interactive" capability that allows a user to click on various links in the document and easily navigate from one area to another. For example, you can click on an algorithm box that has text in blue and link directly to supporting annotation.

A tip for quickly going back and forth within the document:

Go to View, Toolbars, More Tools, Page Navigation, Previous View.

This should give you a back arrow tool that will allow you to go back and forth between views easily.

Note: The interactive links within ICSI PDF guidelines may not work on some mobile devices. However, the GoodReader App (and possibly some other "reader" applications) will allow anyone to open ICSI interactive PDF Guidelines on their mobile device and utilize most of the interactive capabilities.
