

Tips for Viewing PDF files

These PDF files have an interactive capability that allows a user to click on various links in the document and easily navigate from one area to another. All text in blue is a link to another page within the document, or another website.

A tip for quickly going back and forth within the document:

Go to View, Toolbars, More Tools, Page Navigation, Previous View.

This should give you a back arrow tool that will allow you to go back and forth between views easily.

Note: The interactive links within ICSI PDFs may not work on some mobile devices. However, the GoodReader App (and possibly some other "reader" applications) will allow anyone to open ICSI interactive PDF files on their mobile device and utilize most of the interactive capabilities.
