**GENERAL COMMENTS:**

None

**MEDICAL CONTENT:**

1. I would like to see the exact questions to ask females 18 years and older if they are at risk for osteoporosis. I also like the fact that males over 50 are included in assessing risk of osteoporosis. (CentraCare)

*Thank you for your comment. Please see risk assessment section for details regarding risk factors for osteoporosis.*

2. Page 5 notes that people should do dairy 3 times a day. It should say consume calcium three times a day (it does not need to be dairy) (Hudson Physicians)

*Thank you for your comment. We have made that correction.*

**PRIORITY AIMS AND SUGGESTED MEASURES:**

None

**SUPPORT FOR IMPLEMENTATION:**

None
