

Algorithm(s)

The Preoperative algorithm was removed and an Index was created.

Annotations

Introduction rewritten to reflect the merger of the Preop Guideline and Periop Protocol and the reorganization of the document.

1) Choosing Wisely statement added to preoperative basic health assessment and medication review.

2.11) Evidence for beta-blockers updated. Three new recommendations added for beta-blocker therapy.

2.3) Two new recommendation statements were added to diabetes mellitus, including new literature. (Meneghini, 2009)

2.33) Newer Anti-Diabetic Medications section added.

3.1) Antibiotic Selection: Recommendation of weight-based dosing for cefazolin added.

3.3) Total Joint Replacement language cleaned up.

3.5) Antibiotic Administration organized into Pre, Intra and Post.

4.1) Preoperative Showering/Shaving language cleaned up.

Aims & Measures

No Changes.

Appendices

Deleted the following appendices:

- Incorporating Human Factors Systems Design into work process design
- List of Invasive, High-Risk or Surgical Procedures
- Beta Blocker Table
- Preoperative Form-Adult
- Preoperative Form-Pediatric

Moved Antibiotic table from document to appendix.

Created new dosing table and added to appendix.

Added Choosing Wisely recommendations as an appendix.

ICSI Patient Advisory Council (PAC)

Teach Back was added as a definition.
