

**Diagnosis and Treatment of Respiratory Illness in  
Children and Adults Guideline**

---

1. The ICSI Diagnosis and Treatment of Respiratory Illness in Children and Adults guideline has been revised and re-organized. The content is separated into five main sections:
  - Initial Presentation
  - Viral Upper-Respiratory Infections
  - Acute Pharyngitis
  - Non-Infectious Rhinitis
  - Acute Sinusitis
  
2. This guideline has the following algorithms:
  - Main algorithm. Information on treatment for Viral Upper-Respiratory Infections is included in this algorithm.
  - Acute Pharyngitis algorithm. This includes diagnosis, treatment options and follow-up for acute pharyngitis.
  - Non-Infectious Rhinitis algorithm. This includes diagnosis, treatment options and follow-up for allergic and non-allergic etiologies.
  - Acute Sinusitis algorithm. This includes diagnosis, treatment and follow-up for acute bacterial sinusitis.
