

## **Guideline Executive Summary**

**The ICSI Perioperative Guideline** has been enhanced to include a new section-**Perioperative Opioid Management**-that was developed by a separate work group and reviewed and approved by the Perioperative Guideline work group. The new section addresses the entire continuum of perioperative opioid management (preoperative, intraoperative and postoperative).

The Perioperative Guideline addresses and includes recommendations on the following topics:

### **Section 1: General Preoperative Management**

1. Preoperative Health Screening and Assessment
2. Preoperative Testing (Electrocardiogram, Chest X-Ray, Hemoglobin/Hematocrit, Potassium/Sodium, Creatinine, Pregnancy, Hemostasis, and Glucose in Non-Diabetics)
3. Obstructive Sleep Apnea
4. Nicotine Cessation
5. Preparation for Surgery

### **Section 2: Perioperative Management of Select Conditions**

6. Cardiovascular Diseases and Medications: Review of Select Recommendations from American College of Cardiology/American Heart Association Guidelines
7. Prevention of Endocarditis: Endorsement of Recommendations from American College of Cardiology and American Heart Association Guidelines
8. Anticoagulants/Antithrombotics
9. Diabetes Mellitus

### **Section 3: Perioperative Opioid Management**

10. Preoperative Opioid Management
11. Intraoperative Pain Management
12. Postoperative Opioid Management
13. Perioperative Considerations for Patients with Opioid Use Disorder (OUD)
